

Hi Rob,

When you talk to most people about building a new home mainly you hear the horror stories - dishonest builders, shoddy construction etc. As I've told Fred, I feel like I stumbled upon a goldmine with Garden Time! I really just saw the modular home photo in your catalog when I was buying the shed a few years ago and that's what started me onto it.

The cabin itself was constructed to perfection, I can't get over the fit and finish! I'm sure Fred has told you the local building department commented they haven't seen it's equal for a modular. Site work was all executed beautifully with incredible coordination by all parties... and it was so helpful to have suggestions from experts like Fred to advise on last minute details like exact placement of the garage, how stairs and even lighting could best be setup. I've received countless positive comments from everyone who comes by.

As you know the entire process wasn't easy due to the various issues I had outside of Garden Time and my control... but I'm very glad I pushed on and have been rewarded with a beautiful home and a valuable investment.

Also I do love my custom floor plan and I know others do too - SO glad you were able to put that together for me! Thank you so much, keep up the great work and I'll continue to highly recommend you guys to anyone who listens!

Alison

Homes & Structures
A Division of Garden Time

If you are considering a new home as a vacation retreat or your primary home, come see the many options of our modular homes and how they can satisfy your needs. These homes are constructed to meet the local building codes for the township of where it will be

delivered. Floor plans are easily customizable and we are committed to building your home your way. Modular sections are built inside a manufacturing facility so that the build process is never exposed to weather elements thus eliminating any potential mold issues.

We can help with utility setup (i.e. well, septic, power), excavation, foundation, appliances, heating system, and landscaping. Many of these services we can do or provide information to your reputable contractor.
